

YOUR ENERGY PARTNER OF CHOICE IN AFRICA

Oryx Energies is one of the largest independent providers of oil and gas products and services in Sub-Saharan Africa. We are also one of the region's longest-established energy companies supporting its economic and social development and for over 30 years we respond to consumers, industry and maritime operation's needs.

OUR PRESENCE

Oryx Energies is a group of companies, headquartered in Geneva (Switzerland) and majority-owned by the private investment group AOG.

We are present today in 17 countries, through 24 affiliates, and we have been responding to the evolving energy needs of the region for over 30 years.

We aim to be the most extensive and integrated energy platform in Sub-Saharan Africa.

- 16 South Africa

HSSEQ

In the interests of our staff, our clients, our partners and the communities in which we operate, Oryx Energies aims to become a reference in Health, Safety, Security, the Environment and Quality (HSSEQ). To achieve this, the integrated management system for all Oryx Energies operations has been certified in the form of an "integrated" multi-site and multi-activity certificate responding to the criteria of **ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018**.

Triple certification
ISO 9001:2015
ISO 14001:2015
ISO 45001:2018

YOUR ALL-IN-ONE PLATFORM

We aim to respond to the energy needs of consumers and businesses across Sub-Saharan Africa, by providing a series of reliable and quality products and services, including fuels, LPG and lubricants.

We have built one of the region's most extensive and integrated downstream platforms, mastering the value chain: from the purchase of the physical products on the open market, through our trading arm (Addax Energy), to their storage: blending, distribution and on-site management.

TRADING & BUNKERING

Our trading team sources crude oil and refined products on the open market from all over the world, and supplies our downstream activities and third parties. Liquid hydrocarbons remain an important energy source today, whether in the form of fuels (such as petroleum, gasoline or jet fuel), Liquefied Petroleum Gas (primarily butane and propane) and oils (for making lubricants). All over the world, hydrocarbons are essential to powering engines and turbines for a wide variety of applications including transportation (road, air and sea) as well as being used for heating, cooking, power generation, construction and many other things.

Our bunkering team supplies fuels, marine lubricants and other specialised services, both offshore and on the high seas. We service commercial vessels, fishing fleets and all types of offshore platforms. Using high-quality ships and experienced crews that comply with the most stringent international standards.

BtB

Beyond the supply of fuels, lubricants and LPG, we offer businesses a wide range of value-adding services tailored to their specific requirements. In dialogue with our customers, our staff provides personalised advice on the solutions that best respond to each client's needs.

We aim to offer a seamless service from product sourcing to waste disposal, taking the worry out of the energy necessary to power businesses and work with our customers to optimise their energy costs and performance.

BtC

Across Africa we benefit from a large service station network to directly sell our products. We ensure that our fuels are always pure and undiluted. Customers can always be confident that when it says Oryx on the pump, the engine will be getting the quality it deserves to give its best and most reliable performance. Across our network, we also offer a large range of gas, lubricants and NFR (None Fuel Retail) products, always focusing on quality without compromise.

LPG

We have been promoting LPG as a versatile, affordable, cleaner and more efficient energy alternative since the late 1990s. Using our network of LPG storage and filling facilities, we provide our customers - consumers and industry - with cylinder and bulk services in both urban and rural areas. With over 7 million cylinders in circulation, we continually strive to meet Africa's growing energy demand, even in remote areas.

LUBRICANTS

Since starting in lubricants in 1999, we have become experts in this area, with a reputation for innovative, premium-quality products and services. Our products include an extensive range of automotive, marine and industrial lubricants and greases. We manage the process from formulation through production and distribution, including technical support, with ISO-certified facilities close to our markets in Dar Es Salaam (Tanzania) and Lomé (Togo).

OUR VISION

We aim to continue being one of the most trusted and respected independent group in Sub-Saharan Africa which operates in the energies industry.

We will continue to invest in the expansion of our product and service network, adapted to population and our customers, to ensure continent-wide access to oil and gas products for all domestic and industrial use.

Today we are all powered by Africa, with Sadio Mané

Over the past few years, we have adapted to Africa's energy needs, providing reliable, safe and sustainable solutions to individuals and businesses.
